*Energy has become one of the most important policy areas in the European Union. Business critical issues like market regulation, energy security, climate change, infrastructure, energy efficiency and the development of new technologies (renewable, nuclear, CCS) are shaped by the European Union and its policies. The FleishmanHillard energy team has specific experience on communicating on energy issues, working with clients across the sector (gas, nuclear, renewable energies, electricity production, etc.). Our team is an excellent combination of strategic sector expertise with a strong public affairs and communications track-record.*
